

Why did you consider using Magellan?

Easy file access

“We’ve only had it a couple of weeks but we use it regularly now. We got it for students to access their files, and we’re moving to teachers accessing SIMS too. We wanted a portal where people could access their work from outside school and it’s been ideal for that.”

Access to applications

“The fact that you can access applications is a bonus, for example the kids can access 2D Design and things like that. I’m looking forward to using it a lot more, adding applications for example.”

Simple to set up

“It was easy to set up and I haven’t had any complaints – I actively seek out feedback good or bad – but I haven’t had any complaints about Magellan, it’s been very good. It does take a little while to get used to it but its fine, easy to use once you get the hang of it.”
